

Koby Miller

Section number: 11207

Assignment number: 2

Date due: 1/21/2020

```
C:\Users\Koby\Desktop\School\Spring2020\DatabaseSystems\hw2>java SimpleJDBC
hw2 connected.

All of the information about every Beer:

( Bud, Anheuser, 180 )
( Bud Light, Anheuser, 125 )
( Busch, Anheuser, 200 )
( Corona, Crown, 175 )
( MGD, Miller, 220 )
( Miller Light, Miller, 110 )
( Modela, Crown, 225 )
( Wicked Ale, Pete's, 200 )

bar and price for every bar that sells 'MGD' :

( Happy Hour, 1 )
( Joes Place, 1.5 )

C:\Users\Koby\Desktop\School\Spring2020\DatabaseSystems\hw2>
```

Queries used:

- 1) SELECT \* FROM Beers;
- 2) SELECT \* FROM sells WHERE beer = 'MGD';
  - a. But in the Java I only printed out the bar and the price
